

powering the future

elexon is looking for a

Technician (m/f/d) for electrotechnical inspections on charging infrastructures and photovoltaics Northern or Southern Germany

for the mobility transition and the development of charging infrastructures in Germany and Europe.

Key responsibilities:

- Coordinating on-site inspections at our customers' premises in Northern Germany.
- Conducting on-site electrotechnical surveys for the installation of charging infrastructures and, where applicable, PV systems.
- Documenting and drafting plans of on-site conditions for our technical project managers including installation locations, required preparatory work and pre-installation plans for electrical engineering.
- Applying virtual reality/augmented reality technology for 3-D live documentation

Qualifications:

- Vocational training as an electrician in the fields of building services engineering, infrastructure systems, energy or industrial engineering or a comparable qualification
- Construction site experience and, ideally, experience in surveying project sites and/or recording site inspections
- Ideally initial experience with e-mobility and PV systems
- Experience in preparing documentation and site plans
- Friendly and customer-oriented manner
- Strong German language skills
- A strong willingness to travel throughout Northern Germany

powering the future

elexon benefits:

The opportunity to actively shape the e-mobility field of tomorrow and stimulate a promising field of business.

Challenging tasks with a variety of perspectives for personal development in a motivated team with flexible work schedules and the opportunity to work mobile or as a digital nomad during a "workation"

You are a fan of flat hierarchies and working independently, as well as making decisions quickly? Then you've come to the right place! You can also learn from our experienced colleagues and grow professionally. In addition, we offer tailor-made continuing education opportunities.

When it comes to staying fit, you can register at a fitness or health center at special rates or, for example, lease a company bike as part of your salary. In addition, we offer you 30 vacation days plus extras at Christmas and Carnival season.

Collegial teamwork and an open work environment are particularly important to us, so in addition to free drinks and fruit, we also organize regular team events.
