

# Tridens EV Charge

Supercharge your EV Network with  
GenAI Management Platform

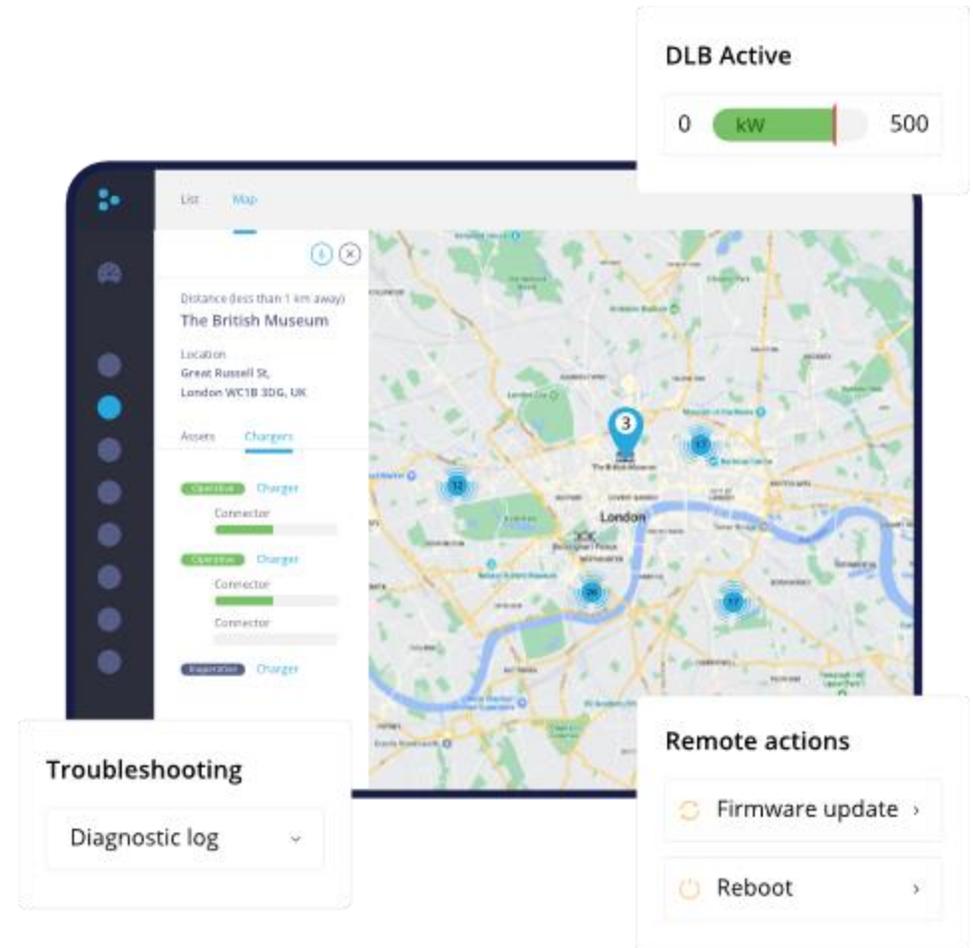

# Key Capabilities

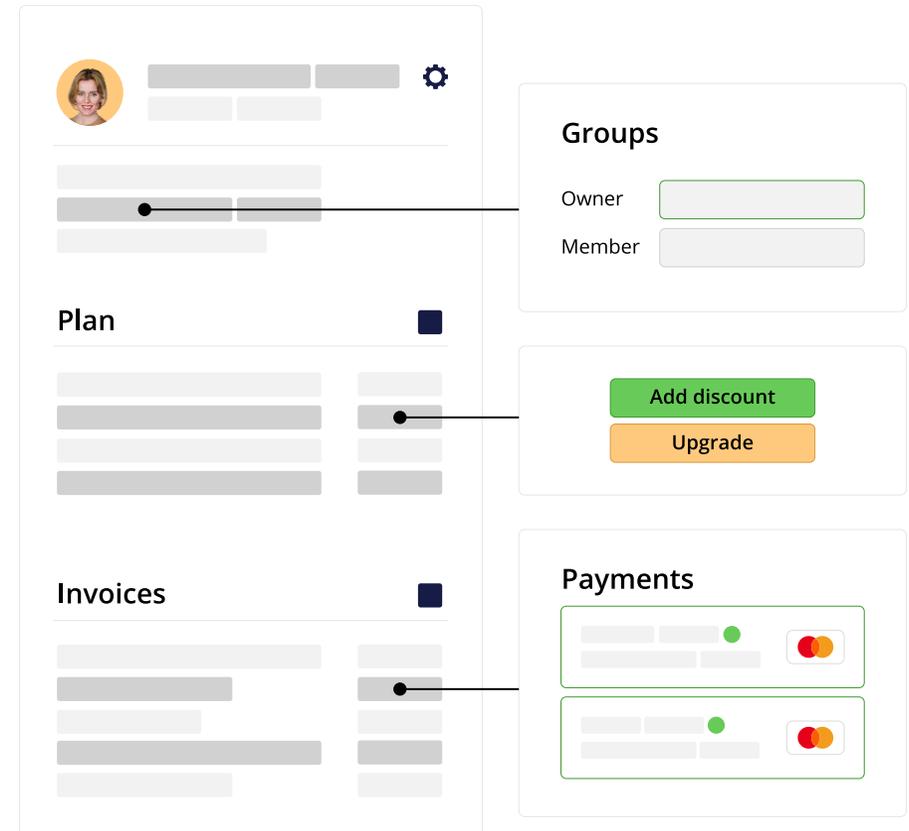

# Infrastructure Management

- Manage and monitor EV charging stations, chargers, connectors and sessions
- Monitor with notifications
- Smart energy management with dynamic load balancing
- Troubleshoot problems
- Apply remote commands (reboot, firmware update, diagnostics, etc.)
- Dashboard with real-time data and Google maps
- Hardware flexibility through Open Charge Point Protocol – OCPP

# Customer Management

- Find and keep track of your customers via an intuitive user interface
- Monetary and non-monetary balances of services
- Billing and account receivable (AR) history
- Upsell and cross-sell services
- Set notification thresholds
- Manage payments and write off items

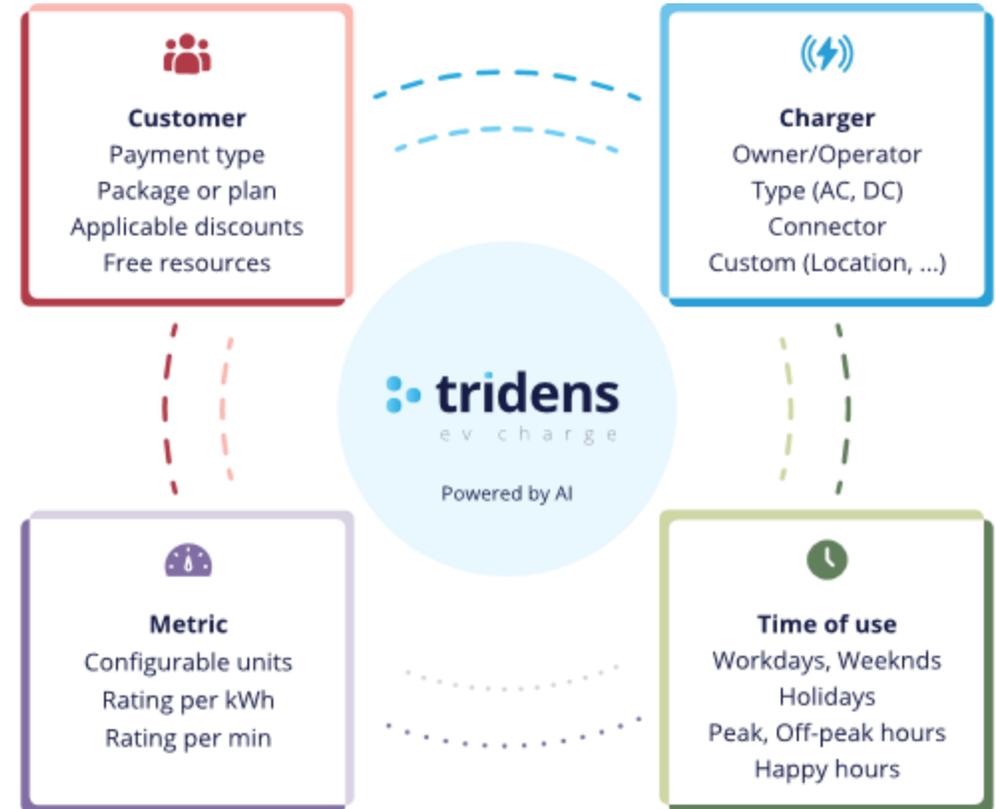

# Customer Mobile App

- Branded mobile apps with the local language, and local currency
- Charger map, availability & reservation
- Filter on charging capacity, connector type, and availability
- Find and navigate to an EV charger
- Managing various payment options
- Issue submission
- Managing a charging session
- Charging notifications
- Charging history

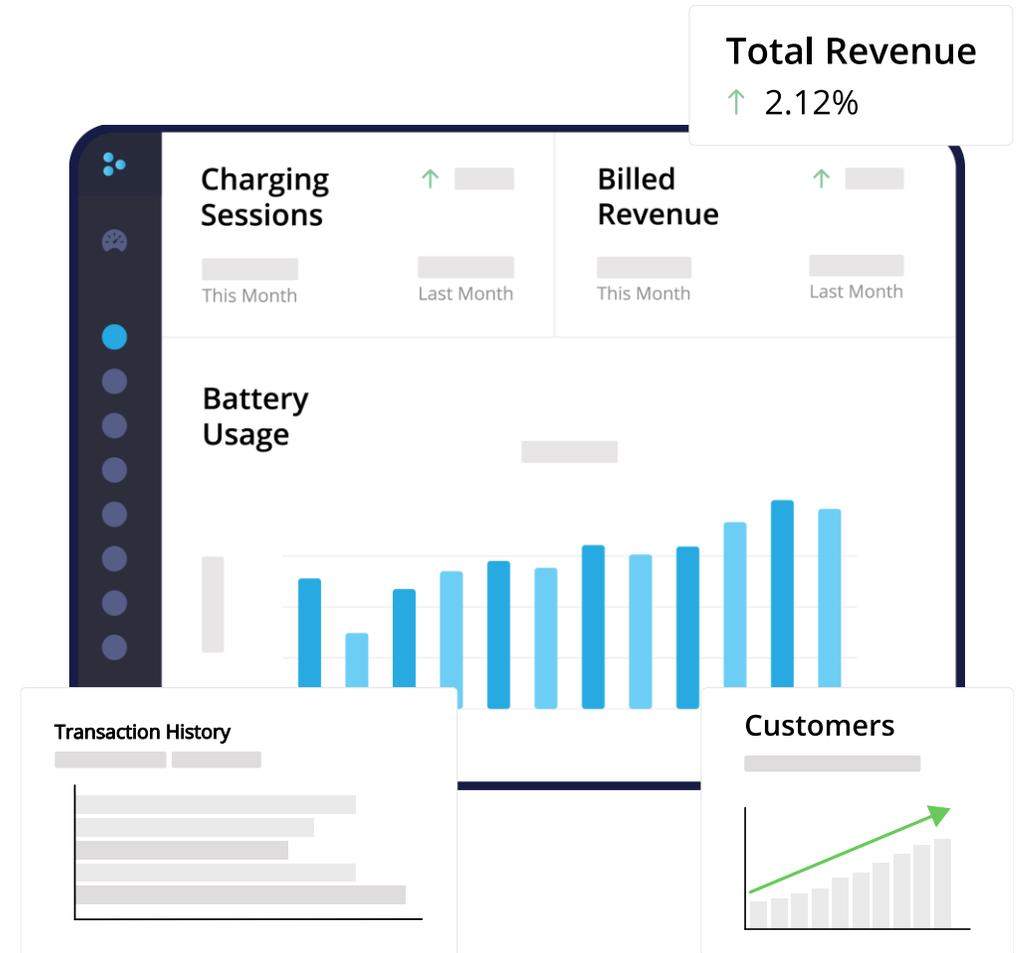

# Monetization

- Prepaid, postpaid & pay-per-charge business model
- Personalized offers, promotions, and advanced discounts
- Different payment options – Credit & Debit cards, Vouchers, etc.
- Billing & Invoicing

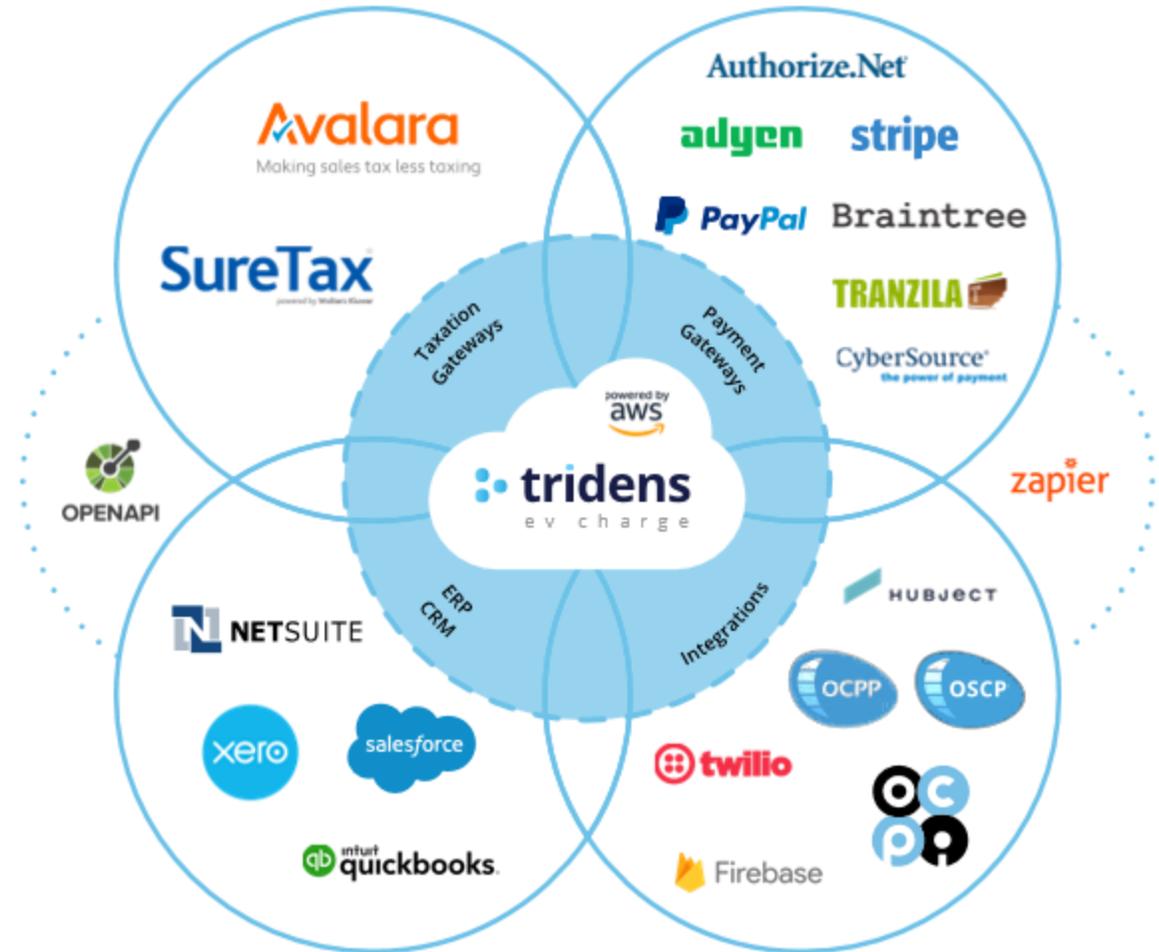

# Reports & Real-time Analytics

- Users
- Plans
- Revenue
- Payment Transactions
- Charging Sessions
- Stations
- Chargers, etc.

# Ecosystem

- Integrate with ease
- Automate your business processes
- Reduce menial tasks
- Free up resources

# Benefits

## AI Powered

Utilizing AI to assist with pricing design and boost management efficiency.

## Web-based Management

Manage all aspects of your EV charging infrastructure, customer & partner relations, charging, billing and payments, view realtime analytics, and reports.

## Operational Excellence

Ensure EV charger stability and availability and reduce total cost of ownership with smart charging management.

## Awesome Customer-Centric UX

The white-label customer mobile app for Android & iOS is intuitive and well-designed. Being the front-end of the service, it truly delivers an awesome user experience.

## Business Superiority

Monetize your EV charging network, support innovative business models, and improve customer experience.

## Technological Leadership

Certified for Charge Point Protocols (OCPP 1.6j, OCPP 2.01) and compliant with ISO 15118, enabling vehicle-to-grid (V2G) communications, allowing for virtually any modern charging station.

# Smart EV Charging Management Software Powered by AI

Unlock your potential. Let's do it together.
