

# Iskraemeco Success Story

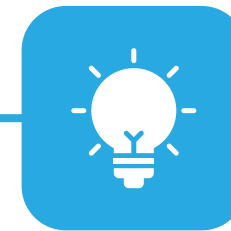

*Working with Tridens blends technical expertise with client-focused strategies, facilitating smooth transitions from in-house solutions to advanced, comprehensive EV charging infrastructure management solutions.*

Urban Matko, CTO

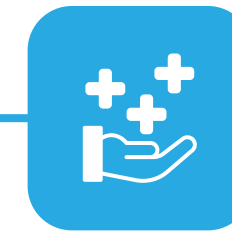

## Challenges

- In-house development and maintenance
- Advanced pricing and reporting
- CPO management

## Solution

The client migrated from an in-house solution to Tridens EV Charge on AWS to easily manage any OCPP 1.6J (or 2.0.1) charger and utilize advanced rating functionalities for innovative pricing models and reporting. Drivers use the white-label mobile app and RFID cards, while CPOs can manage their portion of the charging infrastructure.

## Benefits

- Hardware-agnostic software
- OPEX reduced by 60%
- Reducing manual work and streamlining operations

Iskraemeco provides comprehensive eMobility solutions, focusing on supporting EV charging infrastructure, ensuring grid stability, protecting charging stations, and offering a unified payment gateway.

Tridens EV Charge is an all-in-one solution for eMSPs and CPOs powered by AWS. Designed to manage any OCPP 1.6J or 2.0.1 compatible charger and offer a seamless driver-experience with highly flexible pricing capabilities.
