

PRESS RELEASE

KATHREIN eMobility at Power2Drive 2025 KATHREIN presents innovative charging technology

KATHREIN will showcase its eMobility portfolio at Power2Drive in Munich. The proven and well-established wallbox portfolio—available in both standard and calibration law-compliant versions—will be presented with new features at the trade fair.

- KATHREIN Charging Solutions: Intelligent charging technology “Made in Germany”
- KATHREIN Wallbox Portfolio: Smart wallboxes in standard and calibration-compliant versions
- KATHREIN Apps: Intuitive user interfaces
- KATHREIN White Label Options: Customized design and feature variants

The latest features in the established applications include:

- easyOperate
 - Automatic email dispatch of charging data
 - Voice output for various wallbox notifications and statuses
- easyBalance – Load Management
 - Dynamic and static load management
- easyCheckIn – Check-in and check-out application
 - Ideal for hotels and the hospitality industry
- easyInstall – Installation and commissioning app
 - Function cards can be configured with different charging modes

The KATHREIN Group stands for technological expertise, advanced development capabilities, and innovative manufacturing “Made in Germany.” Since 1919, this Bavarian family-owned business has drawn on its deep roots in electrical engineering to develop long-lasting, high-quality products for a nationwide sales network. KATHREIN eMobility offers sustainable charging solutions and a broad range of services.
