

PRESS RELEASE

KATHREIN eMobility Premiere at Power2Drive 2025 KATHREIN presents the new Duo Charging Station – KWD in Munich

At the international trade fair for charging infrastructure and electromobility, KATHREIN eMobility will unveil its new calibration law-certified, innovative charging station Duo – KWD. The modern charging station, proudly Made in Germany, enables simultaneous charging of up to two electric vehicles, each with a maximum power of 22 kW.

- Calibration law-compliant charging unit per charging point – fully exchangeable
- Metal housing meets IK10 and IP54 standards
- 2 charging points, each with up to 22 kW
- Automatic load balancing between both charging points
- Network connectivity via LAN or LTE
- One display per charging point for charge status and preparation for dynamic QR code (AFIR-compliant)
- Plug & Charge capable according to ISO15118-2

In combination with the KATHREIN Payment Station (KWP), the KATHREIN Charging Station (KWD) forms a perfectly coordinated, calibration law-certified charging park package.

The KATHREIN Group stands for technological expertise, strong development capabilities, and innovative manufacturing “Made in Germany.” Since 1919, this Bavarian family-owned company has leveraged its extensive expertise in electrical engineering to develop high-quality, durable products for a nationwide sales network. KATHREIN eMobility provides sustainable charging solutions and a wide range of services.
