

PRESS RELEASE

KATHREIN eMobility Premiere at Power2Drive 2025 KATHREIN presents its new charging park solution in Munich

The Bavarian company KATHREIN, known for its long-standing tradition, will present its new turnkey all-in-one charging park solution alongside its well-established standard and calibration law-compliant wallbox offerings in various functional variants.

At the international trade fair for charging infrastructure and electromobility, KATHREIN eMobility will showcase its new calibration law-certified payment and charging station. The station enables convenient and easy payment processing, for example through contactless payment with Girocard, debit or credit card, Google Pay, or Apple Pay.

The modern charging station allows simultaneous charging of up to two electric vehicles, each with up to 22 kW of power.

- Turnkey all-in-one solution
- Calibration law-compliant (German Eichrecht)
- Ensures accurate billing of charging sessions
- Made in Germany

With its turnkey solution, KATHREIN provides a plug-and-play charging park for businesses—from planning through to commissioning.

The KATHREIN Group stands for technological expertise, strong development capabilities, and innovative manufacturing “Made in Germany.” Founded in 1919 with deep roots in electrical engineering, this Bavarian family-owned company develops durable, high-quality products for a nationwide sales network. KATHREIN eMobility offers sustainable charging solutions and comprehensive services.
