chargecloud provides e-mobility software for charging infrastructure at Ford's German sites

1,400 charging points, two major sites in Germany: Ford Germany will consolidate the management of its charging infrastructure on a central software platform in the future. chargecloud provides the operating system to control, monitor and bill the charging points in Cologne and Saarlouis, as well as for selected home charging applications used by company car drivers. The collaboration is intended to lay the foundation for uniform charging infrastructure management at further Ford sites in Europe.
